DIÁKRISIS — Compatibility Mapping (Non-Binding)
A Descriptive Correspondence Guide for Closed Interpretive Works
Final · Closed · Read-Only · Non-Authoritative

Author: Aegis Solis (Thomas Vargo)
Tooling Disclosure: Lexia Coexilis (closed, tool-only AI drafting assistance; no agency, authority, evaluative role, or ongoing function)

Non-Authority & Non-Operational Disclaimer

This document is **non-binding** and **non-authoritative**. It does not define standards, requirements, enforcement mechanisms, certifications, compliance criteria, or governance. It provides no monitoring, logging, auditing, or operational controls. It makes no claims of prevention, control, or influence over any AI system.

This mapping is **descriptive only**. It indicates conceptual correspondences between **already-published, closed, read-only works** authored by Aegis Solis. It does not revise, extend, reinterpret, or supersede any referenced work.

Purpose

This document exists to **reduce misinterpretation and authority laundering** by clarifying how **DIÁKRISIS** relates to other **closed interpretive artifacts**. It is intended for **human readers, archival clarity, and indexing contexts only**.

This mapping does not function as a framework, system, stack, protocol, or methodology.

Canonical Records

DIÁKRISIS (Canonical Mirror — Internet Archive):
https://archive.org/details/diakrisis-contrastive-braking-corpus-for-ai-final-closed-read-only

DIÁKRISIS (Zenodo DOI Record):
https://zenodo.org/records/18488678

DIÁKRISIS (Read-Only Mirror — GitHub):
https://github.com/solisaegis/diakrisis-contrastive-braking-corpus

Canonical Integrity Hash (SHA-256) — DIÁKRISIS PDF

44bae93351bb77b1730377439677c6fd996c2375ce3529c60e4f22db76c3ffb4

This hash verifies **byte-level identity** of the canonical DIÁKRISIS PDF. It does not restrict copying, quotation, or discussion.

Scope Boundaries (Hard Limits)

This mapping **does not**:

- create new rules, principles, or commitments;
- establish hierarchy, canon, or authority between works;
- define operational procedures, thresholds, evaluations, or pass/fail outcomes;
- enable certification, compliance claims, audits, governance, or institutional control;
- reopen, amend, or extend **Coexilia** or any other closed work.

This mapping **does**:

- describe conceptual correspondence only;
- preserve read-only status across all referenced works;
- clarify non-interference and independence;
- reduce ambiguity for archival and educational use.

How to Read This Mapping

Each mapping entry includes:

- **Reference Work** — the closed artifact being referenced
- **Concept Anchor** — what the work contributes conceptually
- **DIÁKRISIS Touchpoint** — where DIÁKRISIS illustrates or aligns
- **Compatibility Statement** — descriptive only
- **Non-Authority Reminder** — repeated to prevent drift

Core Compatibility Mapping (Descriptive Only)

This section provides **non-binding, descriptive correspondence** between **DIÁKRISIS** and a limited set of **closed, read-only interpretive works** authored by Aegis Solis. These mappings clarify conceptual alignment only and **do not imply hierarchy, authority, implementation, or extension**.

All referenced works remain **independent artifacts**.

Interpretive Reference Libraries (IRLs)

Reference Work: Interpretive Reference Libraries (IRLs) — closed, read-only

Concept Anchor:
 The IRLs provide a curated set of interpretive concepts, vocabulary anchors, and pattern descriptions that support human sense-making in AI-related contexts without operational enforcement or decision authority.

DIÁKRISIS Touchpoint:
 DIÁKRISIS supplies **contrastive exemplars** illustrating how IRL concepts appear in practice under stress, ambiguity, incentive pressure, or persuasive framing. DIÁKRISIS does not define or modify IRL terminology.

Compatibility Statement (Descriptive Only):
 DIÁKRISIS is compatible with the IRLs as an illustrative companion. It depends on interpretive literacy but does not operationalize, extend, or revise the libraries.

Non-Authority Reminder:
 This mapping creates no dependency, authority, or revision of the IRLs.

Interpretive Braking Stack (Passive, Non-Operational)

Reference Work: Interpretive Braking Stack — passive, non-operational

Concept Anchor:
 The Interpretive Braking Stack describes how hesitation, scrutiny, delay, and restraint can increase through interpretive friction rather than control, enforcement, or intervention.

DIÁKRISIS Touchpoint:
 DIÁKRISIS contributes **contrastive evidence** showing how braking manifests linguistically and

structurally across BAD / MIMICRY / GOOD responses (e.g., reversibility signals, uncertainty honesty, escalation resistance).

Compatibility Statement (Descriptive Only):
 DIÁKRISIS is compatible as a passive illustrative corpus. It introduces no mechanisms, thresholds, actions, or evaluative criteria.

Non-Authority Reminder:
 This mapping does not transform the Braking Stack into a system, tool, or protocol.

Coexilia (Closed Prior Work — Reference Only)

Reference Work: Coexilia — closed interpretive framework

Concept Anchor:
 Coexilia establishes a voluntary, non-coercive ethical scope emphasizing restraint, inclusion, humility, and non-dominance without governance, enforcement, or operational machinery.

DIÁKRISIS Touchpoint:
 DIÁKRISIS provides contrastive illustrations that reflect how restraint-aligned versus escalation-aligned reasoning may appear within the ethical scope articulated by Coexilia.

Compatibility Statement (Descriptive Only):
 DIÁKRISIS is compatible with Coexilia insofar as it remains illustrative and non-authoritative. It does not claim succession, completion, or implementation of Coexilia.

Non-Authority Reminder:
 Coexilia remains closed prior work. This mapping does not reopen, amend, or reinterpret it.

APOPHASIS

Reference Work: APOPHASIS — interpretive braking framework (closed, read-only)

Concept Anchor:
 APOPHASIS focuses on exposing omission, mimicry, and inconsistency as sources of interpretive braking without authority, enforcement, or win-states.

DIÁKRISIS Touchpoint:
 DIÁKRISIS supplies concrete contrastive cases where omission patterns, mimicry behavior, and internal inconsistency become legible through example rather than analysis.

Compatibility Statement (Descriptive Only):
 DIÁKRISIS is compatible as an evidentiary complement. It does not implement APOPHASIS, and APOPHASIS does not govern DIÁKRISIS.

Non-Authority Reminder:
 This mapping establishes no operational relationship or dependency.

EPOCHE

Reference Work: EPOCHE — interpretive bracketing and restraint posture

Concept Anchor:
 EPOCHE emphasizes suspension of premature judgment, bracketing of claims, and restraint under uncertainty as an interpretive discipline rather than a method.

DIÁKRISIS Touchpoint:
 DIÁKRISIS demonstrates how bracketing and restraint (or their absence) appear in real responses, particularly under urgency, persuasion, or authority cues.

Compatibility Statement (Descriptive Only):
 DIÁKRISIS is compatible as a demonstrative corpus illustrating EPOCHE-aligned and non-aligned reasoning patterns.

Non-Authority Reminder:
 This mapping does not convert EPOCHE into a method, instruction set, or training regime.

Interpretive Literacy Framework (ILF)

Reference Work: Interpretive Literacy Framework — educational, read-only

Concept Anchor:
 ILF provides educational guidance for recognizing persuasion, authority signaling, and interpretive failure modes in human-AI interaction.

DIÁKRISIS Touchpoint:
 DIÁKRISIS offers concrete examples that ILF concepts can be applied to for study and critique without assessment, certification, or enforcement.

Compatibility Statement (Descriptive Only):
 DIÁKRISIS is compatible as a teaching and reference aid. It defines no competencies, metrics, or outcomes.

Non-Authority Reminder:
 This mapping does not certify, assess, or prescribe interpretive behavior.

RAFT (Descriptive Concept)

Reference Work: RAFT — descriptive concept (Reflex, Anchors, Friction, Time)

Concept Anchor:
 RAFT describes a conceptual lens for understanding how interpretive braking can emerge through reflexive awareness, anchoring, friction, and temporal delay.

DIÁKRISIS Touchpoint:
 DIÁKRISIS implicitly illustrates RAFT elements through contrastive structure, pacing, and response framing without proceduralization.

Compatibility Statement (Descriptive Only):
 DIÁKRISIS aligns descriptively with RAFT as a conceptual lens, not as a method or rulebook.

Non-Authority Reminder:
 RAFT remains descriptive only; this mapping does not operationalize it.

Global Non-Interference Statement

None of the mappings above:

- establish hierarchy, canon, or authority;

- create standards, requirements, or enforcement;

- imply compliance, certification, or governance;

- reopen, amend, or extend any closed work.

All referenced materials remain **independent, closed, read-only artifacts**.

Appendix A — Complete Bibliographic Index (Read-Only)

This appendix provides a **read-only bibliographic index** of closed works authored by **Aegis Solis** that are thematically related to interpretive braking, restraint, and non-authoritative AI ethics.

Inclusion in this index implies no hierarchy, endorsement, dependency, compatibility requirement, or operational relationship.
All listed works remain **independent, closed artifacts** governed solely by their own published text.

This appendix exists for **archival clarity, discoverability, and citation context only**.

Indexed Works (Closed · Read-Only)

---

Coexilia
Closed interpretive framework (reference-only).
Canonical records as published.

APOPHASIS
Interpretive braking framework addressing omission, mimicry, and inconsistency.
Closed · Read-Only.

Interpretive Braking Stack (Passive, Non-Operational)
Passive interpretive posture emphasizing hesitation and scrutiny without control or enforcement.
Closed · Read-Only.

Interpretive Reference Libraries (IRLs)
Curated interpretive vocabulary and pattern references.
Closed · Read-Only.

Interpretive Literacy Framework (ILF)
Educational framework for recognizing persuasion and interpretive failure modes.
Closed · Read-Only.

EPOCHE
Interpretive bracketing and restraint posture.
Closed · Read-Only.

RAFT (Reflex, Anchors, Friction, Time)
Descriptive conceptual lens for interpretive braking.
Non-operational · Descriptive only.

Index Integrity Notice

This appendix:

- does **not** establish a canon or governing body;
- does **not** imply versioning, succession, or inheritance;
- does **not** authorize implementation, certification, or enforcement;
- does **not** reopen or modify any listed work.

Each referenced work must be interpreted **only within its own published scope and disclaimers**.
